EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian Kaul on 12/1/04.

The application has been amended as follows:

See the attached full version of the pending claims with claims 17-24 being cancelled herewith. They replace ALL previous versions.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance. The presently claimed spin valve sensor for use with a data storage system comprises: a sense current (I), which is horizontally oriented in a longitudinal direction; a first ferromagnetic free layer having a magnetization (M1) in a first direction that is aligned in the longitudinal direction of the sense current, when the first ferromagnetic free layer is in a quiescent state; a second ferromagnetic free layer having a magnetization (M2) in a second direction that is anti-parallel to the first direction, when the second ferromagnetic free layer is in a quiescent state; a spacer layer between the first and second ferromagnetic free layers; a biasing component producing a bias magnetization field that biases both M1 and M2 in a third direction that is transverse to the first and second directions thereby establishing quiescent bias states for M1 and M2; and wherein M1

Art Unit: 2652

produces a first demagnetization field that biases M2 in the second direction and M2 produces a second demagnetization field that biases M1 in the first direction when the first and second ferromagnetic free layers are in their quiescent states, and M1 and M2 rotate about their quiescent bias states in response to an applied magnetic field thereby producing a GMR effect in the sensor as a function of the rotation of M1 and M2. It is noted that the above configuration(s) do not utilize a traditional "pinned" layer to produce the GMR response.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
